

Pratik Jawade— DevOps Engineer

+91 8605737918 | ✉: pratikjawade608@gmail.com | 📍 Nagpur, MH |  [LinkedIn](#) | [Portfolio](#)

DevOps Engineer with 7+ years of experience in cloud delivery, CI/CD automation, infrastructure provisioning, containerized workloads, data-platform releases, and multi-environment deployments. Hands-on expertise across Azure DevOps, Microsoft Azure, Terraform, Kubernetes/AKS, Docker, Helm, Azure Data Factory, Azure Synapse Analytics, Azure Databricks, Azure SQL, and Google Cloud. Experienced in designing automated build and release workflows, Infrastructure as Code, database and data-platform deployments, monitoring, troubleshooting, and application delivery across development, testing, and production environments.

KEY SKILLS

Microsoft Azure | Azure DevOps | CI/CD | Multi-Environment Deployments | Cloud Automation | Infrastructure as Code | Kubernetes/AKS | Docker | Containerization | Data Platform DevOps | Database CI/CD | Build and Release Automation | Azure Data Factory | Azure Synapse | Cloud Administration | Monitoring & Troubleshooting | Solution Architecture

TOOLS & TECHNOLOGIES

Cloud & DevOps: Microsoft Azure, Azure DevOps, Azure Pipelines, Azure Repos, Azure Artifacts, Azure Web App, Azure Container Registry, Git, GitHub, Jenkins, Google Cloud Platform
IaC & Containers: Terraform, ARM Templates, Ansible, PowerShell, Docker, Kubernetes, AKS, Helm
Data & Database: Azure Data Factory, Azure Synapse Analytics, Azure Databricks, Snowflake, Azure SQL, SQL Server, ETL, DACPAC
Development, Identity & Ops: Python, Node.js, npm, React, Flask, Microsoft Entra ID, Managed Identity, SSO, Azure Log Analytics, Jira, Confluence

PROFESSIONAL EXPERIENCE

Consultant Hoonartek	Aug 2022 - Present
- Deliver end-to-end DevOps and cloud automation solutions across application, data, infrastructure, and multi-environment deployment workflows. - Design and support multi-environment release workflows spanning Azure Data Factory, Azure Databricks, Azure SQL/DACPAC, Azure Web Apps, containerized services, and AKS. - Build YAML pipelines, Terraform/ARM automation, source-control strategies, monitoring and troubleshooting workflows, and secure identity/SSO integrations. - Implement database and application CI/CD workflows using DACPAC, SqlPackage, Managed Identity, Azure SQL, and Azure Web App deployment automation. - Partner with application and data teams on release planning, deployment governance, defect resolution, and production support.	
Technology Engineer Amdocs India Pvt. Ltd. - AT&T	May 2022 - Jul 2022
- Developed and managed CI/CD processes for application workloads, automated repeatable build/deployment activities, and supported Microsoft Azure environments. - Supported Azure environment configuration, application deployments, infrastructure sizing, and scaling while collaborating with development teams to resolve CI/CD and delivery-related issues. - Supported day-to-day cloud operations and collaborated with application teams to troubleshoot deployment and environment-related issues.	
Senior DevOps Engineer Techvira Technologies Pvt. Ltd.	Sep 2018 - Apr 2022
- Designed, implemented, and supported CI/CD processes for cloud-hosted applications, automating repetitive build and deployment activities across development and release workflows. - Worked closely with development teams to troubleshoot build, release, configuration, and deployment issues and improve continuous delivery processes. - Provisioned and standardized cloud infrastructure using Terraform-based Infrastructure as Code, reducing repetitive manual provisioning activities and improving environment consistency. - Worked across Azure DevOps, Azure Repos, Azure Pipelines, Git, Jenkins, Ansible, Docker, Terraform, and PowerShell for application delivery and infrastructure automation.	

KEY PROJECTS EXECUTED

1. **Project:** Sales Intelligence Platform - Data Integration & CI/CD Deployment | **Duration:** Nov 2025 – Present
Key Achievement: Enabled controlled database and application deployments across Sandbox, Dev/Test, and Production through automated CI/CD and data-integration workflows.
2. **Project:** IndusInd Bank - ADF & Databricks CI/CD Automation | **Duration:** Dec 2024 - Nov 2025
Key Achievement: Automated ADF and Databricks multi-environment deployments and reduced ETL processing time to **under 2 hours**.
3. **Project:** GeoServe - ADF Solution Architecture & Deployment | **Duration:** Dec 2024 - Dec 2025
Key Achievement: Established a structured Stage-to-Dev-to-Production ADF deployment process with Git integration and Snowflake SSO.
4. **Project:** Privacy Request Automation | **Duration:** Nov 2023 – Nov 2024
Key Achievement: Improved processing efficiency by **75%+** across **30–40 weekly requests**, reducing turnaround from **4–6 hours** to around **30 minutes**.
5. **Project:** Cloud-Native Application Platform - Korn Ferry Engagement | **Duration:** Aug 2022 - Nov 2023
Key Achievement: Standardized YAML CI/CD, Docker, Terraform, and Kubernetes/AKS deployment workflows across multiple application modules.
6. **Project:** AT&T - Azure Cloud & CI/CD Automation | **Duration:** May 2022 - Jul 2022
Key Achievement: Automated repeatable CI/CD and Azure deployment activities to improve release consistency across application workloads.
7. **Project:** Humana MRM - Cloud DevOps & Infrastructure Automation | **Duration:** Sep 2018 - Apr 2022
Key Achievement: Saved **15+ hours/week** through CI/CD automation and contributed to approximately **40% infrastructure-cost reduction**.

CERTIFICATIONS

- Microsoft Certified: DevOps Engineer Expert
- Microsoft Certified: Azure Administrator Associate
- Google Cloud Certified: Professional Cloud Architect
- Microsoft Certified: Azure AI Engineer Associate
- Additional Credentials: Gemini Enterprise Deployment | Build with Vertex AI

EDUCATION

- MBA in Marketing Management | Pune University | 2016 - 2018
- Electrical & Electronics Engineering | Amravati University | 2011 - 2015
